Phase I of Spillway Repair

The first phase of the emergency repair to the spillway retaining wall will be completed by the end of this week. Staging of the project began last Friday, November 12th. The contractors, Subsurface Constructors and Plocher Construction, drilled a series of fourteen 14 holes, each decreasing in diameter, along the northern edge of State Route 143 near the spillway. A cage, as pictured, was inserted into each of these holes and filled with concrete. This process will stabilize the roadway until the final repair can be made.

At their meeting on Monday, November 15 the City Council approved an engineering contract with Burns & McDonnell in the amount of \$88,200 to complete the engineering for Phase II of the spillway repair project.

As soon as engineering is completed, the repair project will go to bid. It is hoped that the final repairs will be completed before the spring.

Office Closed

City offices will be closed on Thursday, November 25th for Thanksgiving but will re-open on Friday, November 26th.

Remember that if you have an emergency any time outside of regular business hours you can contact the police department at 654-2131. Each division of the Public Works Department has an employee who is on-call to respond to emergencies such as sewer back-ups or water line breaks. Please don't hesitate to call for such problems.
